Our range of surfaces create expressions for future generations

Steni delivers the widest and most exciting array of solutions: combining multiple formatting opportunities, to the facade industry. Delivering more than 50 million m2 of facades and 55 years in business, we stand as a reputable manufacturer of cost-effective façade solutions with lasting aesthetics.

That is why we offer a 60-year functional warranty.

Steni works closely with building owners, architects and contractors to ensue long-terms relationships. By combining experience with knowledge, innovation and enthusiasm – and by providing good BIM tools, it is our goal that you; our customers, will experience increased value beyond the product itself. Our customers should expect quick and easy service, good logistics solutions and strong customer service

At Steni we believe enduring aesthetics, quality and the environment are the keys to a good future. To verify this we have third party verification and certificates to support our claims. We work hard to minimize waste, reduce CO2 emissions and to ensure that the life cycle costs of the buildings are kept low.

PRODUCT ADVANTAGES

60-year functional warranty

Pre-drilled and cut

Impact resistant

Withstands frost and water

Wide range of colours

Eco-friendly

Easy installation

Durable

Easy cleaning

Adviser competence

Range of surfaces, gloss levels and textures

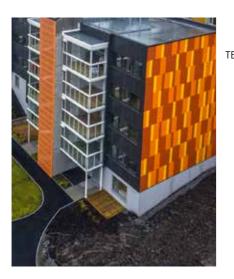

Reduced on site material waste

Easy to remove graffiti

STENI STANDARD FASTENERS (ACID-RESISTANT A4)

Product	Dimensions	No. per pack
Wood screw*	4.8 × 28/33 mm	500 pcs
Metal screw (self-drilling)	4.8 × 25 mm	500 pcs

Stocked with untreated heads, and with painted heads in stock panel colours.
 The screws are supplied with a pan head and a T20 head (see page 23 for a complete overview).

Steni Colour is easy to maintain and quick to install, with minimal waste. The panels are highly environmentally friendly, and thanks to the lifetime warranty of 60 years the total lifecycle cost is the lowest in their class.

Steni Colour is a fibreglass-reinforced stone composite panel suitable for use as cladding on all types of buildings. The panels should be installed in accordance with our installation instructions. Steni Colour is available in a wide range of standard colours and formats, and in three gloss levels, so you will always be able to find a variant that is perfect for your project.

HIGH FIRE CLASS

Steni Colour has B-s1, d0 fire classification (ref our technical datasheet)

STANDARD PRODUCTION FORMATS (mm)

Minimum 10 m² per division.

Steni Colour stocked formats: 1,195 × 2,995 mm. Full production width of 1195 mm is always charged.

Standard panel divisions*	Standard production length
295 + 295 + 295 + 295	1195-3495
395 + 395 + 395	1020-3495
595 + 595	850-3495
795 + 395	1020-3495
895 + 295	1195-3495
1195**	850-3495

- * All panels split from the same full-width panel must be of the same length.
- **No minimum quantity for 1195 mm width.

For a complete overview of available formats, see the tables from page 26 onwards.

Other formats available at an additional cost. Minimum width is 196 mm Steni delivers L-and U-elements (ref. p. 28)

COLOUR CORE

STENI COLOUR PLANK (FS200)

Minimum quantity: 50 m2 80 standard Steni Colour décors. Edge paint can be ordered in the same colour.

Format (height x length) including drilling.

- · 196 x 1795 mm
- · 196 x 2395 mm
- 196 x 2995 mm

ABOUT COLOUR CODES

All standard surfaces have a unique Steni code beginning with SN, e.g. SN 8010 (Colour), SN 100 (Nature)In addition we give NCS colour codes for Steni Colour to make it easier for you to match the colour with other products.

COLOUR PRECISION

We check the colour of Steni Colour using a spectrophotometer, which measures colour differences in accordance with the measuring methods specified in CIE 15:2004.

The permitted variance within the same batch is The permitted variance between different batches is $\Delta E = 3.0$

CAN'T FIND THE COLOUR YOU'RE LOOKING FOR?

We mix all of the colours for Steni Colour ourselves in the factory. This uniquely enables us to offer special colours within the NCS and RAL colour systems. We now have over 2,200 approved colours in our archive, so please contact us if you want a colour that is not in our standard range. Unused paint degrades over time, so all colours, whether standard or special colours, are mixed to order.

Even though our processes are high-precision, there may be small variations between mixes. You may wish to bear this in mind if your project is being planned with partial deliveries. Note that we are unable to offer exact colour matches between multiple production runs.

The samples indicated with a white dot have a light core colour as standard.

The samples indicated with a dark dot have a dark core colour as standard.

^{*}Signal colours cannot be supplied in matt gloss [M]: only in half matt (HM) and high gloss (HG).
Colours that have dark core colour as standard can also be delivered with a light core colour on request.

STENI COLOUR REUSE

The façade system designed for reuse

Reuse of building materials is the current and future answer to several global environmental challenges. Steni Colour Reuse is a façade system designed to be used repeatedly.

Our façade panels are environmentally friendly and have an expected lifetime of more than 100 years which makes them a good choice for the environment and sustainability. Now we have taken the step further by launching Steni Colour Reuse, a set of standardised façade panels that systemise reuse.

These are façade panels that can be reused directly, when they have finished their service in a building. Steni Colour Reuse comes with a written 60-year functional warranty.

STENI COLOUR REUSE PRODUCTION FORMATS (mm)

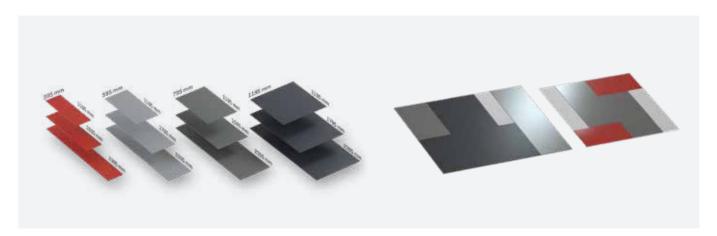

Minimum 10 m² per division.

Standard panel divisions*	Standard production length
395 + 395 + 395	1195,1595,2395
595 + 595	1195,1795,2395
795 + 395	1195, 1595, 2395
1195**	1195, 1795, 2395

^{*} All panels split from the same full-width panel must be of the same length.

Steni delivers L-and U-elements (ref. p. 28)

PROPERTIES OF STENI COLOR REUSE

SUSTAINABLE OPPORTUNITIES

A used Steni facade panel can be reused as it is by adapting the boring on the new facade to the drill pattern on the used facade panel (standard c/c 400 mm or c/c 600 mm).

ROOM FOR FLEXIBILITY AND CREATIVITY

Steni Colour Reuse comes in 12 different panel sizes corresponding to the mindset behind Lego ®. The colour selection is the same as for Steni Colour, i.e. 80 standard colours, of which 70 can be supplied in three gloss levels; M, HM and HG and 10 can be supplied in two gloss levels; HM and HG.

EASY TO ASSEMBLE AND DISASSEMBLE

Steni façade panels are robust and impact-resistant. They can be easily assembled, disassembled, and reassembled again - several times - without being broken in the processes.

STANDARDIZED TO DRILL PATTERN

Steni Colour Reuse is available in 6 formats pre-drilled with standard drilling patterns adapted to c/c 400 mm and 6 formats pre-drilled with standard drilling patterns adapted to c/c 600 mm. The formats and drilling patterns are adapted for both horizontal and vertical mounting.

FROM LINEAR TO CIRCULAR ECONOMY

At Steni we recognize the importance of contributing to a sustainable circular economy. One of our key features is durability and we want to send as little material as possible out of the cycle.

This is why, after reaching the end of one cycle, it is our goal that 100% of Steni Colour Reuse will be reused in either new projects or renovations.

Book a project meeting (follow the QR code).

^{**}No minimum quantity for 1195 mm width.

STENI VISION 60°

A robust and smooth façade panel with a surface of print and electron-beam-cured acrylic for a unique and creative effect.

Steni Vision is a fiberglass-reinforced stone composite panel intended for exterior cladding on all types of buildings. The panels are mounted according to our installation instructions.

Steni Vision is easy to maintain and quick to install, with minimal waste. The panels are highly environmentally friendly, and thanks to the lifetime warrantly of 60 years the total life-cost is the lowest in their class.

We have the opportunity to change colors on all standard Vision patterns at an additional cost.

Take a deep dive into our ocean of surfaces. Use the QR code or see steni com

The digital print technology that we use in the production of Steni Vision enables you as the customer to create a completely unique effect for your façade.

We work closely with skilled graphic designers who can help you to realise your idea. Our partners can help you with everything from the initial concept to finished, print-ready files. As is normal in the field of graphic design and printing, the printing technology is based on the CMYK colour system. Visit our website to find out more about how to plan and realise your Vision project.

Our experts will help you to achieve a brilliant result!

STENI VISION GIVES YOU OPPORTUNITIES

INTEGRATION BLEND IN OR STAND OUT

Adapt your building to its surroundings, or give it a completely different look.

INFORMATION CLEAR MESSAGES

Clear information helps people to decide. Make it clear: who, what, where and why.

IDENTITY A PERSONAL TOUCH

Accentuate your building – give it a unique personality

ILLUSION AESTHETIC TRICKS

Things aren't always what they seem. Optical illusions provide a powerful way in which to highlight architectural expressions.

Steni Vision is easy to maintain and quick to install, with minimal waste. The panels are highly environmentally friendly, and thanks to the lifetime warranty of 60 years the total life-cycle cost is the lowest in their class.

WANT A PARTICULAR PATTERN?

Specific formats and requirements apply. Get in touch with your local sales rep for more information and assistance.

ONE WALL = ONE DESIGN

A single image can be divided up to cover all or part of the façade!

DIGITAL PRINTING —

Steni Vision has a surface that is produced using digitalprinting technology. This gives you, as a designer, a unique opportunity to create an individual look in an easy, modern manner.

CAN'T FIND WHAT YOU'RE LOOKING FOR?

Steni Nature can be ordered with special stone or in a special grade. In that case, our laboratory must approve the type of stone in advance and ensure that the grade chosen is suitable for production. This will result in a unique production run that will give your façade the unique and robust look that you want. Our standards of quality and precision are just as stringent for special orders as they are for our standard colours, but we cannot quarantee that the same type of stone will be available in the future. Please take this into consideration when calculating the size of your order.

STENI PROTEGO

Protego is a robust and weather-resistant roof panel. The roof panel is made of stone composite and is supplied with a smooth or rough surface.

- 40-year functional warranty and > 60-year expected product life.
- Low weight, quick installation, the roof plate can be walked on.
- Suitable for adaptation to integrated "invisible" solar cells.

STANDARD SURFACES _ The samples indicated with a white dot have a light core colour as standard. _ The samples indicated with a gray dot have a dark core colour as standard.

Other colours and surfaces can be project customized.

SN 305 SAND NCS S 9000-N

FORMAT

595 x 595 1195 x 1195

For straight or diagonal mounting.

SOLAR CELLS

- Adapted to the format for integrated solar cells
- Roof tiles that are adapted to solar cells are normally coloured.
- Steni Protego roof tiles and solar cells ca be installed continuously side by side in the same installation process.

Feel free to contact us for further information.

DRILLING

Steni protego roof panels come pre-drilled.

terra by STENI® 25Y

A robust and natural foundation panel with a surface of crushed natural stone.

DO YOU WANT TO ADHERE YOUR FACADE WITH ADHESIVE?

Our partners have tested and approved adhesive systems adapted to our Steni Colour facade panel. The products must be purchased directly from the distributors. Installation instructions for approved adhesive systems can be downloaded by scanning the QR code on the right side.

Installation instructions: Scan the QR code or visit steni.com

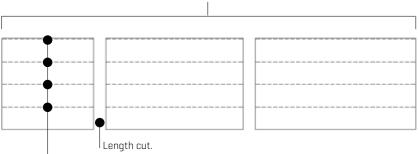

FORMATS AND DRILLING

ABOUT THE FORMAT TABLES

The panels are produced as a continuous sheet that is initially cut into lengths of 850–3,495 mm. These full-width panels are then divided in accordance with the widths stated in the format tables. Therefore, each full-width panel can only be divided into smaller panels of the same length. There is no required minimum order size for split panels of the same length within each full-width panel. However, the total quantity of the split panels must add up to the area of the full-width panel concerned (see diagram).

If divisions that do not meet the minimum-quantity requirement are ordered, we will attempt to produce these as custom formats. If even this is not possible, the panels will be supplied full-width, and must be adapted on the construction site. Any such panels will be supplied along with a drawing showing how they should be cut with minimal waste.

Same panel division, but different panel lengths. The total area must satisfy the minimum quantity.

An optimal production requires that the number of split panels always adds up to the full-width panel produced. Unfortunately, in some cases parts of the full-width panel cannot be used. There are three things in particular that will affect this.

- -Choice of width format
- -Variation in length format
- -Splitting up of the order

Steni is committed to supplying sustainable solutions that make better use of our resources and reduce the strain on the environment. By discussing your project with us at an early stage, you as a customer can help us in this important work and also help to reduce your project costs.

Splitting full-width panel (here 4×295 mm): see the panel division column in the tables below for possible configurations. All panels split from the same full-width panel will always be of the same length.

The minimum quantities in the tables refer to this division.

PRODUCTION FORMATS FOR STENI COLOUR

STANDARD PRODUCTION FORMATS (mm)

CUSTOM PRODUCTION FORMATS (mm)

Minimum 10 m² per division.

Minimum 20 m² per division.

STANDARD PANEL DIVISIONS*	STANDARD PRODUCTION LENGTHS	CUSTOM PANEL DIVISIONS	CUSTOM PRODUCTION LENGTHS	MAX. NUMBER OF PANELS SPLIT FROM A FULL- WIDTH PANEL
295 + 295 + 295 + 295	1195-3495	292-294	1195-3495	Full width of the panel is divided into 4 formats

^{*} The maximum length of Steni Vision elements is 3190 mm

STENI COLOUR / STENI VISION

HANDLING UTILITIES

For a simple and safe handling of panels on the building site, we recommend that you use appropriate handling utilities.

Examples of handling utilities.

Spacer Block 5mm.

Glass vacuum lifter

Spacer Block for profile.

FAKTA

HEALTH AND SAFETY IS IMPORTANT

Frequent and heavy lifting is a strain on the body. Follow the recommendations of the local labour inspection authority.

ADVICE FOR PURCHASERS

BUY STENI

Steni only sells through building material dealers. If you are a private individual, you should contact your local supplier of building materials. If you are working on major projects requiring more follow-up, please contact one of our sales teams directly or scan the QR code below.

STOCK ITEMS

If you order one of our stock items, your order will normally be shipped within two weeks.

WHAT YOU GET

All our products are delivered on pallets, securely packed with protective plastic and straps. Each pallet is labelled with prod-S.T.ENI. Danmark A/S Galoche BDESS. 4600 Køge T: +45 70 27 01 22 E: steni@steni.dk viding information about its contents and brief instructions about storage and handling on site, as well as the necessary acceptance inspection.

There will also be information about where you can download installation instructions in your language.

Please remember that you will need to have a forklift truck available to unload the delivery at the construction site. If you do not have a forklift truck, a lorry crane will have to be ordered

WHAT TO CONSIDER

Firstly, as a customer you must decide which products you want and what you want the façade to look like. The formats, colours and composition you choose have a great bearing on the result in terms of both appearance and total cost. If you cannot use our standard formats, we recommend that you contact your local sales representative, who will be able to help you so that together we can find the best solution for your project.

During this process, we will also consider the choice of colour and gloss level, how on-site logistics will be handled, and various other aspects that you as a customer will have to decide on when you purchase custom formats from us. A phone call to us at an early stage can save you a lot of work, time and cost later in the

You should order via your local supplier of construction products or through one of our sales team. STENI will be happy to help you to set up your order and thereby ensure that we understand your needs. For more information, refer to our sales and delivery terms.

Book a project meeting (follow the QR code).

STENI AROUND THE WORLD

Developing and manufacturing high-quality façades in Larvik, Norway since 1965.

Our products have been developed in the most demanding climate, and every day all over the world our façade panels are tested against the wind and weather, sun and rain and temperature fluctuations.

We have developed our products based on decades of experience and feedback, and today we can offer façade panels with a number of unique product advantages and a 60-year functional warranty.

Steni panels are both eco-friendly and pollution-resistant. Robust yet lightweight. Fireproof and frost-resistant. They keep their colour, and moisture just runs off. We call this Steni quality.

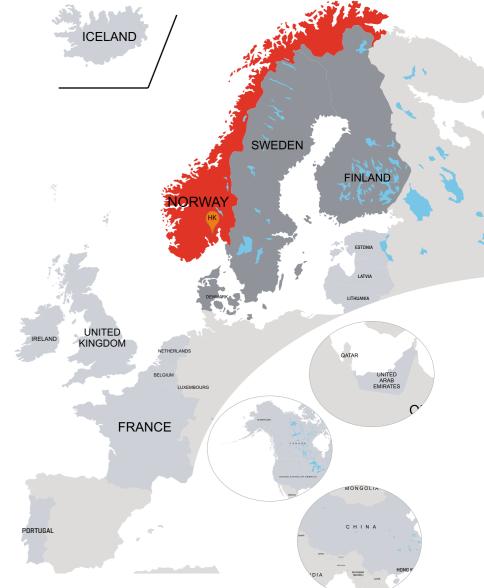

Today, we have sales companies and distributors throughout Europe, North America and the Middle East, and Steni façade panels protect and adorn buildings all over the world.

Steni distributors

Canada China France UK Hong Kong Israel Iceland Knrea Latvia/Lithuania Mexico Belgium/Netherland/Luxemburg Portugal US
